Much more.

<p>* 100 GB Bandwidth Additional bandwidth is available for \$3.95 per GB per month. We can also do a temporary increase until the end of the month if needed.</p> <p>For your site to use more then 100GB of transfer/ bandwidth your site would have to be receiving a large number of visitors on a daily basis and/or have many pages that are being accessed.</p> <p>Example: Every time one of your web pages is viewed by someone on the internet, the size of that page goes towards your bandwidth usage. Below is an example of how many times a page would have to be viewed to reach 100GB of transfer</p> <p>30kb pages = 104,857,600 / 30 = 3,495,253 views 40kb pages = 104,857,600 / 40 = 2,621,440 views 50kb pages = 104,857,600 / 50 = 2,097,152 views 60kb pages = 1,747,626 views</p>
